Continuation of 11. does NOT place the application in condition for allowance because: the Applicant's arugments are not persuasive, and the amendment fails to overcome the rejection. Kidder discloses the detection of faults. It means that is a corruption in a filesystem. Examiner interprets the claim in the broadest meaning. The claim recites that provide repair for the said first portion of said filesystem. The claim does not recite how to repair the filesystem. Kidder provides the recovery the fault and to fix a particular error (column 35, line 27+). The filesystem is in operating system, the overall structure in which files are name, stored and organized. A filesystem consists of files, directories, or folders and the information needed to locate and access these item (dictionary) therefore, filesystems can be any file or software or kernel. Further, Kidder discloses detecting corruption (fault detecting) (see column 35, line 41+) of the filesystem and isolating the corruption (column 35, line 27). Kidder discloses all limitations of claimed invention so the claim is not patenably distinct from the reference for structure to Kidder.
